SCOTT FREESKI BOOTS

— ANYWHERE, ANYTIME COMFORT AND PERFORMANCE

SCOTT OFFERS A FRESH LINEUP OF FREESKI-ORIENTED BOOTS FOR 2015-16 TO DRIVE SKIERS TO EXPLORE ALL MOUNTAIN TERRAIN. THE INNOVATIVE LASTING FIT IS CLOSEFITTING AND RESPONSIVE, GIVING OUR BOOTS A PERFECT MATCH BETWEEN YOUR FEET, INNER LINER AND SHELL. SCOTT BOOTS EMPLOY THE BEST TECHNOLOGY AND MATERIALS PRESERVING FOOT AND LOWER LEG MOBILITY DURING SKIING OR HIKING.

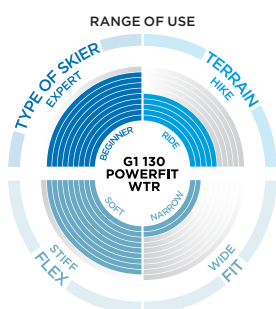

SCOTT G1 130 POWERFIT WTR SKI BOOT

236374

The SCOTT G1 130 POWERFIT WTR is our signature freeskiing boot, offering the highest levels of performance and comfort. The anatomical upper shell is the result of a high-performance injection process. An integrated walk system gives skiers mobility on the up and stability on the down.

COMPOSITION:	POWERFIT Elastollan®	FEATURES
FLEX INDEX:	130	+ Outsole Rubber Pad
FORWARD LEAN:	13° + free for walking	+ Ski/Walk Mechanism
CUFF ROTATION:	25°	+ WTR® Outsole Pads featuring Norm ISO 9523
CANTING REGULATION:	2 positions	+ Adjustable Spoiler
CLOSURE:	4 Ergal® Micro Adjustable Buckles + Dynamic Power Strap	
LAST WIDTH:	97mm	
LINER:	PWR Fit High WTR	
SYSTEM:	WTR	
APPROX. WEIGHT:	2146g (size 26.5)	
SIZE:	23-30.5	

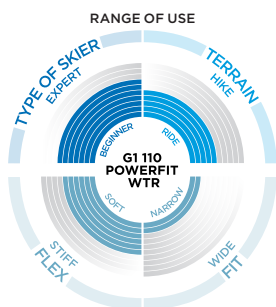

white/green

SCOTT G1 110 POWERFIT WTR SKI BOOT

237746

The SCOTT G1 110 POWERFIT WTR is a state-of-the-art ski boot offering the highest level of performance in a 110 flex boot. The anatomical upper shell is the result of a high-performance injection process. An integrated walk system gives skiers mobility on the up and stability on the down.

COMPOSITION:	POWERFIT Elastollan®	FEATURES
FLEX INDEX:	110	+ Outsole Rubber Pad
FORWARD LEAN:	13° + free for walking	+ Ski/Walk Mechanism
CUFF ROTATION:	25°	+ WTR® Outsole Pads featuring Norm ISO 9523
CANTING REGULATION:	2 positions	+ Adjustable Spoiler
CLOSURE:	4 Ergal® Micro Adjustable Buckles + Dynamic Power Strap

SCOTT G2 130 POWERFIT
SKI BOOT

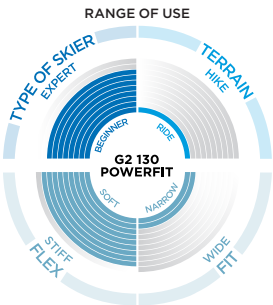

239772

New for the 2015-16 season, SCOTT's G2 POWERFIT 130 features POWERFIT shell technology and a thermoformable liner in a hard-charging 130 flex. This boot offers true alpine performance and comfort in any condition.

COMPOSITION:	POWERFIT Elastolan®	FEATURES
FLEX INDEX:	130	+ Outsole Rubber Pads
FORWARD LEAN:	13°	+ Removeable Outsole Pads
CLOSURE:	4 Ergal® Micro Adjustable Buckles + Dynamic Power Strap	+ Adjustable Spoiler
LAST WIDTH:	97mm	
LINER:	PWR Fit High	
SYSTEM:	ISO Alpine	
APPROX. WEIGHT:	2142g (size 26.5)	
SIZE:	23-30.5	

black/blue

SCOTT G2 110 POWERFIT
SKI BOOT

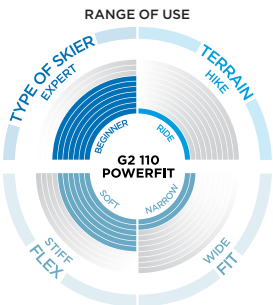

236375

SCOTT's versatile G2 POWERFIT 110 is much like the G2 POWERFIT 130, but with a 110 flex. This boot features POWERFIT shell technology with thermoformable liner and all-day comfort in any kind of terrain and snow conditions.

COMPOSITION:	POWERFIT Elastolan®	FEATURES
FLEX INDEX:	110	+ Outsole Rubber Pads
FORWARD LEAN:	13°	+ Removeable Outsole Pads
CLOSURE:	4 Ergal® Micro Adjustable Buckles + Dynamic Power Strap	+ Adjustable Spoiler
LAST WIDTH:	97mm	
LINER:	PWR Fit High	
SYSTEM:	ISO Alpine	
APPROX. WEIGHT:	2142g (size 26.5)	
SIZE:	23-30.5	

black/green

SCOTT G2 90 POWERFIT H SKI BOOT

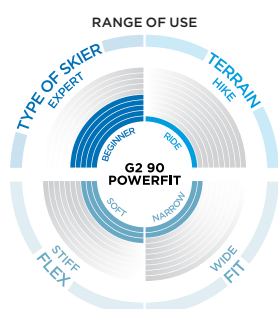

236376

SCOTT's versatile G2 POWERFIT 90 H has all the great features of the G2 POWERFIT 110, in a softer, more forgiving flex.

COMPOSITION: POWERFIT Elastollan®
FLEX INDEX: 90
FORWARD LEAN: 13°
CLOSURE: 4 Ergal® Micro Adjustable Buckles + Power Strap

LAST WIDTH: 97mm
LINER: PWR Fit High Evo
SYSTEM: ISO Alpine
APPROX. WEIGHT: 2060g (size 26.5)
SIZE: 23-30.5

FEATURES
+ Removeable Outsole Pads

white/mykonos blue

SCOTT G2 90 POWERFIT M SKI BOOT

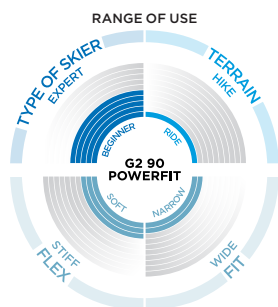

236377

G2 POWERFIT 90 M offers a lower cuff height engineered specifically for shorter legs.

COMPOSITION: POWERFIT Elastollan®
FLEX INDEX: 90
FORWARD LEAN: 13°
CLOSURE: 4 Ergal® Micro Adjustable Buckles + Power Strap

LAST WIDTH: 97mm
LINER: PWR Fit Mid Evo
SYSTEM: ISO Alpine
APPROX. WEIGHT: 1850g (size 24.5)
SIZE: 23-27.5

FEATURES
+ Removeable Outsole Pads

CARBON INLAY
OPTIMAL STIFFNESS

For 2015-16, we introduce the New Powerlite Carbon shell, combining strength and stability with carbon frame inlays from a Grilamid® material injection. This lightweight technology allows for perfect and precise mobility of the foot on the up and strong stability during the down. SCOTT also proudly introduces the first liner to use GORE-TEX® technology, keeping feet dry in all conditions. Throw on Dynafit® certified tech inserts and this is the boot every mountain explorer was dreaming of last winter and will be using this winter.

COMPOSITION:	POWERLITE CARBON Grilamid® + Carbon Inserts Bi-material tongue for proof and mobility
FLEX INDEX:	125
FORWARD LEAN:	11.5° + free for walking
CUFF ROTATION:	60°
CANTING REGULATION:	2 positions
CLOSURE:	3 Ergal® Micro Adjustable Buckles + Buckle Strap System
LAST WIDTH:	103.5mm
LINER:	PWR Lite High GORE-TEX®

SCOTT SHELL TECHNOLOGIES

1 POWERFIT

Our Powerfit shells feature a revolutionary plastic injection process exclusive to SCOTT. Unlike traditional processes that require two different materials to achieve different flex properties, our unique process allows us to create different densities with one material injection.

SCOTT's Powerfit shells offer true comfort and precision never reached before in ski boot technology. The new unique overlap closely follows the anatomy of the foot and lower leg for unmatched downhill performance. Powerfit design allows more independent movement between the cuff and lower shell. That means better walking, climbing, and skiing with a progressive downhill flex.

- + The Powerfit shell technology spreads contact evenly over the tibia for a progressive forward flex and the quickest, most responsive ski control.
- + Powerfit shells' fit has evolved for maximum comfort, including a roomier toe, wider forefoot, and narrower heel.
- + The Powerfit overlap design follows the contours of the foot and ankle closely for lightning-fast response and comfort.

2 POWERLITE

The ski mountaineer's dreams become a reality with SCOTT's Powerlite technology. These Powerlite 4-buckle and 2-buckle ski mountaineering boots make no compromise in skiing performance for their incredibly light weight. Ergonomically fitting and easy to use, these boots don't just ski well for how light they are, they flat-out ski incredibly well, period.

New for 2015/16, SCOTT presents the Powerlite Carbon technology, an innovative shell construction utilizing pre-shaped carbon inlays in the injection process. This unique technology increases lateral strength, and cuts down on weight, all while maintaining excellent ankle mobility and strong, confident flex.

- + Powerlite boots deliver precise, solid, secure skiing performance with their superlight, stiff, supportive Grilamid® shell.
- + Instant comfort with highly-refined, pre-punched shell "forma" and PWR Lite Liner.
- + These boots are made for walking, with a huge range of motion, a full-length rubber sole for compromising terrain, and expanded PU inserts in the sole for insulation, comfort, and increased ski feel.
- + Introducing SCOTT's unique variable flex cuff technology on Superguide Carbon, Orbit II Carbon, Nova II Carbon; Cosmos II and Celeste II.

3 POWERTOUR

SCOTT's Powertour is technology that conveys confidence. The overlap is a seamless part of the shell, with no tongues or riveted-on pieces that flex, create gaps, and dissipate energy.

- + Overlap improves touring by naturally rotating out of the way when walking to allow more freedom of movement than any tongue design.
- + Powertour shell structure has superior lateral and torsional rigidity with a solid, progressive forward flex.

SCOTT LINER TECHNOLOGIES

SCOTT'S INNER LINERS ARE INNOVATING THE BOOT WORLD ONCE AGAIN WITH IMPROVED MATERIALS THAT OFFER MAXIMUM COMFORT AND PRECISION ON ALL MODELS OF THE SKI BOOT LINE. THERMO FORMABLE TECHNOLOGY HAS BEEN IMPROVED TO BETTER SHAPE TO A SKIER'S FOOT. SCOTT IS PROUD TO INTRODUCE GORE-TEX® TO OUR LINERS, ELIMINATING WET FEET. ULTRALON® FOAM REMAIN A TRIED AND TESTED STAPLE PRODUCT. ALL OF OUR LINERS ARE ENGINEERED AND BUILT WITH A UNIQUE THERMO FORMABLE PROCESS IN ITALY. QUALITY LINERS MEAN HAPPY CUSTOMERS. AT SCOTT THAT IS PRIORITY NUMBER ONE.

THERMOFOAMING PROCESS: SCOTT'S LINERS ARE PRE-THERMO SHAPED TO SPECIFIC SCOTT SHELLS, YET CAN BE HEAT-MOLDED FOR TOTAL CUSTOMIZATION. TEN MINUTES AT 80 DEGREES CELSIUS.

SCOTT ENGINEERS THREE UNIQUE GROUPS OF PWR LINERS SPECIFICALLY DESIGNED FOR ITS INTENDED PERFORMANCE CATEGORY:

PWR LINERS:

- **PWR FIT:**
The Alpine / Freeski category featuring liners with precise shape for optimal performance
- **PWR LITE:**
The specific lightweight
- **PWR TOUR & Telemark:**
The touring and telemark specific liners

PWR FIT LINERS

SCOTT PWR Fit Liners are offered in all Freeski Performance boots.

SCOTT PWR Fit Liners offer a waterproof entrance and the ability to be shaped to any users foot.

Available in three performance categories:

PWR Fit WTR:
G1 130 Powerfit WTR;
G1 110 Powerfit WTR

PWR Fit High:
G2 130 Powerfit,
G2 110 Powerfit

PWR Fit Evo:
High Evo: G2 90 Powerfit H
Mid Evo: G2 90 Powerfit M

PWR LITE LINERS

SCOTT PWR Lite Liners are offered in all Freeski Touring boots.

After two years of R&D, SCOTT proudly introduces the GORE-TEX® membrane. The ultimate membrane technology is applied on touring inner liners resulting in dry feet for 6 to 8 hours of intense backcountry travel or mountaineering. This introduction of new technology is exclusive to SCOTT boots.

GORE-TEX® inner liners are provided exclusively on the Powerlite models: Superguide Carbon, and Orbit II Carbon.

SCOTT engineers 3 types of PWR Lite liners based on the different needs of mountaineers.

PWR Lite GTX:
Superguide Carbon,
Orbit II Carbon

PWR Lite:
Cosmos II, Celeste II

PWR Lite Evo:
Cosmos, Celeste

PWR TOUR & TELEMAR LINERS

Phantom inner liners are built for intense use and prevent abrasions and damaging. These liners are stable.

All liners are pre shaped and thermo foamed during process construction, providing a ready to ride system right out of the box.

Available in three performance categories:

PWR Tour High:
Phantom, Phantom W's

PWR Telemark High:
Voodoo, Minerva

PWR Telemark Mid:
Synergy

SKI BOOT FEATURES

SHELL TECHNOLOGY

POWERFIT

Powerfit shells were developed around the foot for a custom-boot-fitter fit right out of the box. Their molds are shaped to provide more room for the first metatarsal, room for the "sixth toe," room for the navicular bone, asymmetric malleoli that match the body's natural asymmetry, and a deep, supportive heel cup with space for common heel spurs. Toe width and height have been increased for an even more comfortable fit.

POWERLITE

Powerlite boots are built from Grilamid® material, making them stiffer, lighter, and thinner than other lightweight shells. The Powerlite Frame uses reinforcing ribs throughout the shell and cuff to give maximum rigidity while maintaining a light weight.

POWERTOUR

Powertour boots are developed with an ample forefoot and secure heel. The multi-injected internal "pod" was developed with cutouts to give relief to the vulnerable areas on the skiers' feet (the navicular bone, first, fifth and "sixth" metatarsals).

FULL-LENGTH VIBRAM® BI-DENSITY RUBBER

Full-length Vibram® bi-density rubber over the instep area for maximum grip when scrambling over any terrain that isn't snow. Bi-density composition with firmer black rubber around the sole's perimeter provides durability and superior edging power in step-in bindings. Softer red rubber in the sole's midsection gives a maximum grip for scrambling.

SHOCK DAMPER INSERTS

Shock Damper Inserts are expanded PU foam inserts in the shell's inner sole that act as a shock absorber when skiing, offering additional insulation and comfort, while increasing ski feel.

POWERLITE TONGUE

The Powerlite tongues use two-material-injection to keep snow and water out and offer a better flex in ski and walk mode.

WTR OUTSOLE

The interchangeable WTR Outsole Pads are designed for maximum grip. The WTR Outsole is compatible with Guardian, Warden and other Touring bindings.

QUICK-CHANGE SOLE SETS

For versatility, our boots have two Quick-Change sole sets that are compatible with all three binding norms. The Alpine Sole Set is compatible with the ISO 5355 Alpine Norm.

The optional WTR Sole Set is compatible with the ISO 13992 Touring Norm and the ISO 9462 WTR norm. These soles can be changed in a flash, snapping securely into place, and fixed with hex bolts.

BOOT MECHANISMS

TWINONE® X-CLOSURE

SCOTT's unique TwinOne® X-closure buckle system optimized the forefront foot closure with a simple solution. This system is lightweight and simple.

SKI/WALK MECHANISM

The Ski/Walk Mechanism is designed to not compromise walking and skiing. The lever's asymmetric design makes it easy to open and close with gloves. Adjust the mechanism easily to your preferred lean preference.

ERGAL MICRO-ADJUSTABLE BUCKLES

Light and easy to operate with gloves. Their asymmetric design keeps a low profile without sacrificing ease of use. Buckles are field-replaceable.

DYNAFIT® CERTIFIED INSERTS

New for 2015-2016, SCOTT ski boots feature Dynafit® certified tech inserts. These trusted inserts are the benchmark for security and confidence within the ski touring discipline.

ADJUSTABLE SPOILER

An Asymmetric Spoiler on men's models provides medial and rearward support.

AERO MESH STRAP HOOK-AND-LOOP FASTENER

Aero Mesh Strap hook-and-loop fastener maintains a solid leg closure without over pressuring.

SCOTT BUCKLE STRAP SYSTEM

A unique buckle strap hook-and-loop fastener on Superguide Carbon, simplify the closure and manipulation of the upper cuff during hiking and skiing.

SCOTT DYNAMIC POWER STRAP

The new Dynamic Power Strap helps to conform the leg fit and maintains optimal flex mobility during travel.

WATERPROOF GASKET

The redesigned gasket keeps feet dry and prohibits water and snow from entering the shell.

LOCK CATCHES

SCOTT's Lock catches on the cuff keep the buckles in place when hiking.
