

SCOTT  
HELMETS

# SCOTT HELMETS

—

AT SCOTT, WE TAKE SAFETY SERIOUSLY. FOR 2015-16, SCOTT PROUDLY CONTINUES TO IMPLEMENT AND EXPAND WITH MIPS® BRAIN PROTECTION SYSTEM. WE HAVE INTEGRATED MIPS® INTO ALL OF OUR TOP-OF-THE-LINE HELMETS, MAKING THEM AMONG THE SAFEST, MOST TECHNOLOGICALLY ADVANCED HELMETS TO DATE.

SCOTT SYMBOL HELMET

SCOTT SEEKER HELMET

# MIPS® BRAIN PROTECTION SYSTEM

## HOW A SCOTT HELMET WITH MIPS® WORKS

TAKING A FALL WITH A MIPS® EQUIPPED HELMET IS VERY DIFFERENT

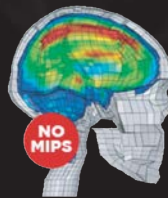

Often when you fall, you fall at an angle. Your head is rotated, causing rotational violence to the brain and strong potential for concussion or more severe injuries.

### A TRADITIONAL HELMET

Helmets are designed and optimized for straight impacts. They do not consider angled impacts. In an angled impact rotational violence is transferred to the head and the brain.

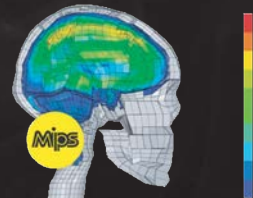

### ROTATIONAL VIOLENCE WITH A TRADITIONAL HELMET

### A HELMET EQUIPPED WITH MIPS®

MIPS® is a low friction layer inside the helmet which allows the head to rotate relative to the helmet in an angled impact. This substantially reduces rotational violence and the potential for damage to the brain.

### ROTATIONAL VIOLENCE USING A HELMET WITH MIPS®

INTEGRATION OPTIMIZED FOR PERFECT FIT AND VENTING

MIPS® LOW FRICTION LAYER

# SCOTT MOUNTAIN HELMETS

—

IN HIGH-ALPINE ENVIRONMENTS, HAVING DEPENDABLE GEAR IS ESSENTIAL, THAT'S WHY SCOTT WORKED CLOSELY WITH OUR TEAM OF WORLD-CLASS MOUNTAIN GUIDES TO DEVELOP OUR MOUNTAIN SPECIFIC HELMETS. WITH FUNCTIONAL SAFETY FEATURES, THESE HELMETS GIVE YOU THE PEACE OF MIND TO KEEP YOUR EYE ON THE PRIZE, NOT ON YOUR GEAR.

## SCOTT COULOIR HELMET

239614

The SCOTT Couloir is designed to shine for all vertical endeavors, up or down. The Couloir, which adheres to both ski and mountaineering safety standards, is a versatile helmet for those seeking protection in climbing and skiing.

**RANGE OF USE:** Mountain  
**CONSTRUCTION:** ABS Top shell  
PC In-mold with EPS liner  
**FIT:** MRAS Fit System  
**SIZE:** S, M, L

### FEATURES

- + SCOTT L.P.D construction (Low Profile Damping)
- + Dual standard (Ski and Mountaineering)
- + Dual padding configuration (Ski and Mountaineering)
- + G-vent system on front
- + Passive venting
- + Lamp fixation

blue matt/chartreuse yellow

black matt

### DUAL PADDING CONFIGURATION: MOUNTAINEERING OR SKI

- + Minimal permanent padding and optimized chinstrap geometry without ear pads ensure comfort and performance in mountaineering conditions.
- + Additional warmer inner lining and winter ear pads make the SCOTT Couloir an ideal solution for extreme skiing conditions.

# SCOTT SNOWSPORTS HELMETS

—

WHETHER YOU'RE LOOKING TO BAG LAPS IN THE PARK, HEAD OUT THE BACKCOUNTRY GATES, OR PAINT THE ENTIRE MOUNTAIN WITH TRACKS, OUR LINE OF SNOWSPORTS HELMETS HAVE YOU COVERED. PACKED WITH FEATURES THAT ENSURE THE HIGHEST LEVELS OF SAFETY AND COMFORT, OUR SNOWSPORTS HELMETS WILL KEEP YOU LOOKING GOOD AND STAYING SAFE ON THE MOUNTAIN, WHEREVER YOU ROAM.

## SCOTT SYMBOL HELMET

239615

The SCOTT Symbol is, flat out, a great helmet. From the Freeride World Tour to backcountry spots across the globe, SCOTT athletes trust their heads with this helmet. Featuring the integrated MIPS® Brain Protection System, the Symbol delivers unmatched protection and performance, while maintaining a low profile and modern look.

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** PC In-mold with EPS liner  
 MIPS® low friction layer  
 PC bottom wrap  
**FIT:** MRAS Fit System  
**SIZE:** S, M, L

**FEATURES**  
 + MIPS® Brain Protection System  
 + G-vent System on front  
 + Active S-vent System  
 + Earphone compatible

## SCOTT SEEKER HELMET

239616

The SCOTT Seeker has been engineered to make its debut for 2015-16 using an ultra light in-mold construction and utilizing the world-renown MIPS® Brain Protection System. With a clean design and active venting the SCOTT Seeker should be on every skier's wish list.

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** PC In-mold with EPS liner  
 MIPS® low friction layer  
 PC bottom wrap  
**FIT:** MRAS Fit System  
**SIZE:** XS, S, M, L

**FEATURES**  
 + MIPS® Brain Protection System  
 + G-vent System on front  
 + Active S-vent System  
 + Earphone compatible

## SCOTT COULTER HELMET

239617

The SCOTT Coulter has the same great low-profile look and superior venting technology as the Symbol without the inclusion of a MIPS\* layer, offering the best quality to price ratio on the market.

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** PC In-mold with EPS liner  
 PC bottom wrap  
**FIT:** MRAS Fit System  
**SIZE:** S, M, L

**FEATURES**  
 + G-vent System on front  
 + Active S-vent System  
 + Earphone compatible

## SCOTT TRACKER HELMET

239618

The SCOTT Tracker is a low profile, lightweight helmet featuring the MRAS Fit System making it a great, comfortable option for the all-condition skier. The Tracker is now available in a variety of sizes and colors for both men and women.

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** PC In-mold with EPS liner  
 PC bottom wrap  
**FIT:** MRAS Fit System  
**SIZE:** S, M, L

**FEATURES**  
 + G-vent System on front  
 + Passive venting  
 + EVA vent plugs

## SCOTT APIC HELMET

239619

New for 2015-16 is the SCOTT Apic, a hard shell constructed, durable helmet. This go-anywhere, do anything helmet is lightweight, comfortable, and offers a high level of protection.

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** ABS Hardshell with EPS liner  
 Fabric bottom wrap on front  
**FIT:** MRAS Fit System  
**SIZE:** S, M, L

**FEATURES**  
 + G-vent System on front  
 + Passive venting

## SCOTT SCREAM HELMET

239620

Park and halfpipe skiers around the globe choose the SCOTT Scream for its safety and style. To keep it clean and stylish, this helmet has been designed with different integrated features such as a removable goggle retainer and adjustable inner vent stoppers.

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** ABS Hardshell with EPS liner  
**SIZE:** S, M, L

**FEATURES**  
 + Three part comfort padding  
 + Padding kit in 3 sizes included (3 thicknesses: 4, 6, 8mm)  
 + Beanie compatible  
 + Deflected front vents  
 + Passive venting

## SCOTT CAMBLE HELMET

230801

The SCOTT Camble is the solution for all rental helmet needs. It has a rugged ABS hard shell construction for relentless durability, with ample venting and comfort all in a clean, modern style and color-coding for various sizing

**RANGE OF USE:** Snowsports  
**CONSTRUCTION:** ABS Hardshell with EPS liner  
**FIT:** MRAS Fit System  
**SIZE:** XS: 230801, S: 230802, M: 230803, L: 230804

**FEATURES**  
 + G-vent System on front  
 + Passive venting

# HELMET TECHNOLOGY

## CONSTRUCTION

### PC IN-MOLD CONSTRUCTION

The outer shell of polycarbonate material is fused with the helmet's impact absorbent foam liner, creating a lightweight outer shell. With reduced weight and bulk surrounding the head, in-mold helmets are more comfortable than traditional helmets.

### ABS CONSTRUCTION

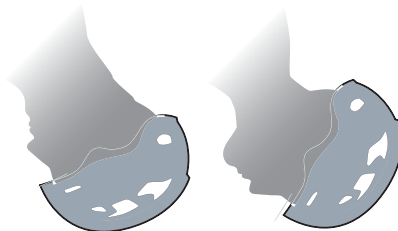

ABS construction provides optimal strength, shock absorption and maximum durability, while a unique and carefully engineered EPS liner provides comfort and added protection.

## MIPS® BRAIN PROTECTION SYSTEM

Almost every time you fall, you fall at an angle. This generates rotational violence to the brain causing concussions and more severe injuries. Extensive research has shown that a helmet with MIPS® absorbs much of the damaging rotational violence generated when the brain hits the ground at an angle.

### ROTATIONAL VIOLENCE WITH A TRADITIONAL HELMET

### A TRADITIONAL HELMET

Helmets are designed and optimized for a straight fall, giving no consideration to the angled impact. All rotational violence is absorbed by the head and the brain.

### ROTATIONAL VIOLENCE USING A HELMET WITH MIPS®

### A HELMET EQUIPPED WITH MIPS®

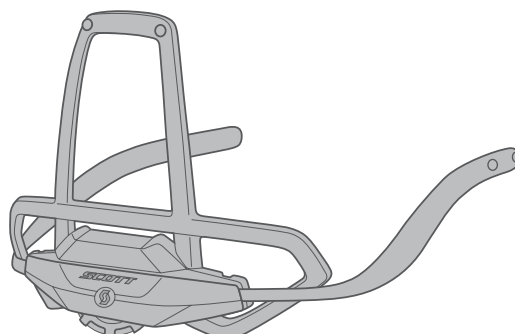

MIPS® is a low friction layer inside the helmet which allows the outer shell of the helmet to rotate relative to the head in a crash. This substantially reduces the damage to the brain.

## FIT SYSTEM

### MRAS FIT SYSTEM

The Micro Rotary Adjustment System (MRAS) offers unparalleled adjustment, comfort and stability. An automatic locking system ensures the desired helmet fit is held securely. MRAS offers uniform comfort throughout the helmet (270° head wrap). An oversized molded wheel makes adjusting with one hand easy and height adjustment personalizes individual fit.

# FIT

## LININGS - 3 DIFFERENT LEVELS

### PERFORMANCE LINER:

one piece ventilated mesh, full liner;  
removable and washable:

*Symbol, Couloir, Coulter, Seeker*

### COMFORT LINER:

one piece fleece, full liner; removable  
and washable:

*Apic, Apic Jr, Tracker*

### EASY LINER

User-friendly full liner available in different  
constructions:

+ Full liner, removable and washable:

*Camble*

+ Three-part padding, removable and washable:

*Scream\**

(\*) hook-and-loop construction in order to use the helmet with beanie

# EAR COVERS

+ All ear covers are removable

+ Different constructions for  
different needs

+ Three different levels

### 3D AUDIO READY

(Shaped construction with audio  
pocket):

*Symbol, Coulter, Seeker*

### 3D

(Shaped construction):

*Couloir, Tracker, Scream*

### 2D

(Contoured construction):

*Apic, Apic Jr, Camble*

# VENT TECHNOLOGY

### THE SCOTT ACTIVE S-VENT SYSTEM

The adjustable Active S-Vent  
System channels air over  
and around the skier's head  
removing stagnant air from  
the helmet. The vacuum effect  
created when the S-vents  
are open, is even more easily  
adjustable thanks to a shell  
construction, allowing the rider  
to determine the right amount  
of airflow.

### THE SCOTT G-VENT SYSTEM

The G-Vent System is SCOTT's  
most advanced helmet venting  
system. Intake vents placed  
on the front of the helmet,  
just above the goggle, pull  
air through the goggle frame  
removing stagnant air that  
causes fogging. The result is  
a venting system that allows  
your goggle and helmet to  
breathe more efficiently.
